Coverage on mammograpfhic screening in 2012

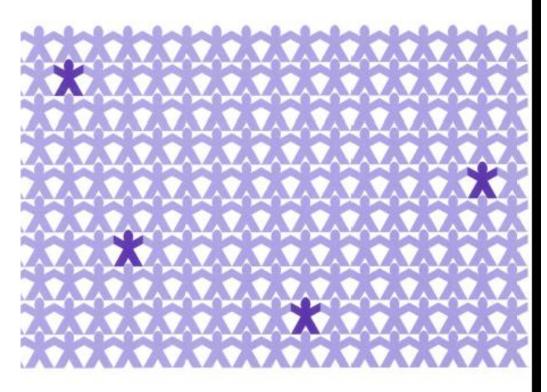

"European estimates of the mammography screening balance sheet of benefits and arms: challenges for comunication and research "

- ONS supported the Italian project "Progetto IMPATTO" on evaluation of mortality and overdiagnosis in Mammograpgic screening
- ONS supported the effort of EUROSCREEN = > an european gruop of experienced professionals in evaluation screening programme
- Evaluation of impact of the screening using the best methodological approaches :
- Benefits (reduction in mortality, reduction af advanced disease ...)
- Side effects (false positives , overdiagnosis Overtreatment...)

Journal of Medical Screening

2012 Volume 19 Suppl 1

Royal Society of Medicine Press

At the end..

• the advantages outweigh the disadvantages.

• The mammographic screening programme shall continue

• the screening programme can be improved on several issues.

Challenges

- To improve the methodology for evaluating the impact of screening programmes
- To decrease overdiagnosis
- To disantangle overdiagnosis from overtreatment
- To improve communication on pros and cons of screening in order to eliminate barrieres for an informed choice
